Internship Professional Experience

Flutter App Development — Battery Low Interactive Ltd. *10/2025 – 10/2025*
Baridhara, Dhaka

- Developed multiple cross-platform mobile applications using Flutter during internship training, including chat applications, e-commerce platforms, news portals, and note-taking systems, with a focus on responsive UI design, state management, and mobile application development.
- Repository: github.com/mihadcse/Internship_Flutter

Education

Islamic University of Technology (IUT) 08/2022 – 10/2026
B.Sc. in Computer Science & Engineering (CSE), Gazipur, Bangladesh **CGPA: 3.35/4.00**

Rajuk Uttara Model College 2014 – 2022
SSC (GPA 5.00, Batch 2019) · HSC (GPA 5.00, Batch 2021) Dhaka, Bangladesh

Projects

Hospital Management App — GitHub · Demo
Appointments, Prescription, Spring Boot, React, PostgreSQL

- Developed a full-stack hospital management system to digitize patient, doctor, appointment, and prescription management through secure role-based access for administrators, doctors, and patients.
- Built a RESTful backend using Spring Boot and PostgreSQL with a responsive React frontend, implementing CRUD operations, authentication, and efficient database management. Team Project

Career_Sync — GitHub · Demo
Job Portal, MERN, JWT

- Developed a MERN-based recruitment platform connecting job seekers with employers through a secure and intuitive web interface.
- Implemented JWT authentication, role-based authorization, company approval workflow, job posting, profile management, and application tracking.Team project

CLIR News Retrieval System — GitHub
Python, NLP, BM25, FAISS, Whoosh, Streamlit

- Developed a multilingual Cross-Lingual Information Retrieval (CLIR) system for Bangla and English news over a corpus of **5,600+ documents** collected from **13 news sources**.
- Implemented lexical indexing with **Whoosh**, semantic search using **FAISS**, and an interactive **Streamlit** interface for multilingual search and retrieval comparison.

CineMatch — Frontend · Backend
Movie Recommendation App, Flutter, Spring Boot

- Built a cross-platform Flutter application integrated with a Spring Boot backend and Supabase database for movie discovery and personalized recommendations.
- Integrated the Gemini API to provide mood-based movie recommendations and an AI-powered chatbot capable of answering movie-related queries.Implemented secure user authentication, bilingual (Bangla & English) support, responsive UI, and dark/light themes to improve user experience.

ClearAid — GitHub · Demo
Donation System, ReactJs, Firebase

- Developed a web-based NGO management platform enabling organizations to publish fundraising campaigns, manage volunteers, and monitor donation activities.
- Implemented Firebase authentication, real-time database integration, and anonymous donation functionality to improve accessibility and transparency. Team Project

BookPlanGo — GitHub
Booking Management System, Java

- Developed a Java-based booking management application for planning tours, hotel reservations, car rentals, and travel expense tracking.
- Applied object-oriented design principles and relational database concepts to manage reservations and generate personalized travel suggestions.Team project.

Skills & Exploration

- **Languages:** C, C++, Java, Python, JavaScript
- **Web/Mobile Development:** ReactJs, NodeJs, ExpressJs, TailwindCSS, Bootstrap, Flutter
- **Databases:** Oracle SQL, PostgreSQL, MySQL, MongoDB, Firebase
- **Tools & Other:** Git/GitHub, AWS, OOP, DSA,MVC, Microservices, VS Code, IntelliJ IDEA, SFML, JWT Authentication
